

An excellent way to help honey bees thrive and survive is to assure they have a diverse and plentiful diet.

You can help by selecting plants that have high nectar and pollen content that bloom throughout the year.

Sonoma County Beekeepers' Association has compiled several resources to **help you, help the bees.**

Please visit our website and find out more today.

Willow	Salix spp.	minor	major	spring
Yarrow	Achillea borealis		minor	summer
Yellow sweet clover	Mellilotus officinalis	major	major	spring

# The Bee Song

(Sung to *I'd Like to Teach the World to Sing*)

I'd like to buzz along with you  
In perfect harmony.  
I'd like you all to sing my song  
In lovely tune with me  
I'd like my bees to buzz along  
From flower to garden flower  
To pollinate those fruits and nuts  
That fill your hearts' desires.

**Chorus** So get busy and plant  
Some veggies, flowers and herbs  
That will keep us a buzzing  
In a lovely world.

We need your help to get along  
So please don't dissappoint.  
We need your blossoms, pure and clean  
We want to make that point.  
So lay off with those pesticides,  
Herbicides and such  
And when we make it through the year  
We'll thank you very much.

## Repeat Chorus

With honey in the fall to spare  
With you, our loving friends  
A 'thank you' gift for all your help  
In tending to our ends.  
So here's a salute from all of us  
To all of you so dear  
Thank you for your help and care  
Throughout the many years.

**Final Chorus** So here's to you  
For all your kind deeds.  
Working in tandem  
We are sure to succeed.

~ lyrics by Kathy Emery
